

Covid19 Preparedness Plan (sources: MDH and CDC)

Arrival and Departure

Teacher(s) will conduct daily wellness and temperature checks as adults and children arrive. In the event the teacher is ill or has a fever of 100.4 or higher, class will be rescheduled.

Arrival: Door will be staffed and unlocked 5 minutes prior to class start time. Please wait in your car until that time. Students will enter with a guardian. If the child or adult has ANY of the following symptoms they will not be allowed to enter the classroom for the health and well-being of the other children and staff:

1. TEMPERATURE or FEVER of 100.4 degrees or above.
2. COUGH
3. SHORTNESS of BREATH

If a child or an adult has a fever (100.4 or higher), they must stay home. Please text or verbally report your child's results, to be recorded by teacher. Healthy children will be admitted to studio.

Social Distancing

Each family's class space will be defined by a small rug placed 6 feet from the next family. Please follow social distancing guidelines and stay on and around your family's rug.

Hand Washing/Sanitizing

Please wash hands just prior to arriving for class (at home or in building bathroom). Hand sanitizer will be available at the door.

Face Mask Use

Teachers will wear a cloth mask as families arrive and depart. Teachers will wear a face shield while teaching the class. Adults attending with children will also wear cloth masks as mandated by state law. Children should only wear cloth face coverings if they can reliably wear, remove, and handle the cloth face covering during class time.

Cleaning and Disinfecting

Cleaning and disinfecting will be conducted before and after each class on all regularly touched surfaces. (The NE studio uses an air purifier and both spaces use a UV light for added sanitizing at the end of each day).

Each family will be assigned a bundle of instruments to be used only by them for the duration of class session. We will ask the adults attending with children to use sanitizing wipes to clean the materials used during class and return to zip locked bags.

Ventilation

Windows will be open as often as possible. Air purifier will be used at the NE studio.

Communication and Training

Teacher(s) will communicate possible/confirmed COVID-19 cases and the measures being taken to keep children healthy, with families in care. The teacher(s) will stay current on the CDC and MDH guidelines regarding COVID-19 and reducing the spread. Families will be notified of any changes and are expected to cooperate in the implementation of the COVID-19 Preparedness Plan including future changes as more information becomes available.

Child, Teacher or Family Illness

Wee Bop will contact MDH to record illness and will expect families to follow CDC guidelines below:

Isolate If You Are Sick

Isolation is used to separate people infected with SARS-CoV-2, the virus that causes COVID-19, from people who are not infected.

People who are in isolation should stay home until it's safe for them to be around others. In the home, anyone sick or infected should separate themselves from others by staying in a specific "sick room" or area and using a separate bathroom (if available).

Who needs to isolate?

People who have COVID-19

- People who have symptoms of COVID-19 and are able to recover at home
- People who have no symptoms (are asymptomatic) but have tested positive for infection with SARS-CoV-2

Steps to take

Stay home except to get medical care

- Monitor your symptoms. If you have an emergency warning sign (including trouble breathing), seek emergency medical care immediately
- Stay in a separate room from other household members, if possible
- Use a separate bathroom, if possible
- Avoid contact with other members of the household and pets
- Don't share personal household items, like cups, towels, and utensils
- Wear a mask when around other people, if you are able to

When you can be around others after you had or likely had COVID-19

When you can be around others (end home isolation) depends on different factors for different situations.

Find CDC's recommendations for your situation below.

I think or know I had COVID-19, and I had symptoms

You can be with others after

- At least 10 days since symptoms first appeared **and**
- At least 24 hours with no fever without fever-reducing medication **and**
- Symptoms have improved

If you had severe illness from COVID-19 (you were admitted to a hospital and needed oxygen), your healthcare provider may recommend that you stay in isolation for longer than 10 days after your symptoms first appeared (possibly up to 20 days) and you may need to finish your period of isolation at home. If testing is available in your community, your healthcare provider may recommend that you undergo repeat testing for COVID-19 to end your isolation earlier than would be done according to the criteria above. If so, you can be around others after you receive two negative tests results in a row, from tests done at least 24 hours apart.

I tested positive for COVID-19 but had no symptoms

If you continue to have no symptoms, you can be with others after:

- 10 days have passed since the date you had your positive test

If testing is available in your community, your healthcare provider may recommend that you undergo repeat testing for COVID-19 to end your isolation earlier than would be done according to the criteria above. If so, you can be around others after you receive two negative test results in a row, from tests done at least 24 hours apart.

If you develop symptoms after testing positive, follow the guidance above for "I think or know I had COVID, and I had symptoms."

Assumption of the Risk and Waiver of Liability Relating to Coronavirus/COVID-19

The novel coronavirus, COVID-19, has been declared a worldwide pandemic by the World Health Organization. COVID-19 is **extremely contagious** and is believed to spread mainly from person-to-person contact. As a result, federal, state, and local governments and federal and state health agencies recommend social distancing.

Wee Bop has put in place preventative measures to reduce the spread of COVID-19; however, Wee Bop **cannot guarantee** that you or your child(ren) will not become infected with COVID-19. Further, attending music classes could increase your risk and your child(ren)'s risk of contracting COVID-19 due to attending with other families.

By signing this agreement, I acknowledge the contagious nature of COVID-19 and voluntarily assume the risk that my child(ren) and I may be exposed to or infected by COVID-19 by attending music classes and that such exposure or infection may result in personal injury, illness, permanent disability, and death.

I understand that the risk of becoming exposed to or infected by COVID-19 at music classes may result from the actions, omissions, or negligence of myself and others, including, but not limited to, teachers, store/studio staff, and program participants and their families. I voluntarily agree to assume all of the foregoing risks and accept sole responsibility for any injury to my child(ren) or myself (including, but not limited to, personal injury, disability, and death), illness, damage, loss, claim, liability, or expense, of any kind, that I or my child(ren) may experience or incur in connection with my child(ren)'s attendance at music classes.

On my behalf, and on behalf of my children, I hereby release, covenant not to sue, discharge, and hold harmless Wee Bop, kiddywampus and Straightline Dance Fitness, its teachers, agents, and representatives, of and from the Claims, including all liabilities, claims, actions, damages, costs or expenses of any kind arising out of or relating thereto. I understand and agree that this release includes any Claims based on the actions, omissions, or negligence of Wee Bop, kiddywampus, Straightline Dance Fitness its employees, agents, and representatives, whether a COVID-19 infection occurs before, during, or after participation in any music class.
